

# GUEST PAGING

## INCREASE PROFITS WITH RESTAURANT PAGERS

Improve the customer turnover with guest pagers that have been built to last.

### Overview

- Maintain a quieter atmosphere by eliminating overhead paging
- Locate guests more quickly, decreasing table turn time
- Minimise wait times
- Give guests the freedom to wander the venue, inside or out.

### How it works

Guests are provided with a coaster style guest pager by the host. When a table or meal is ready, the host will press the appropriate numbered pager and the guest's pager will flash, vibrate and produce an audible alert.

### Features & Benefits

- UHF frequency penetrates walls, ceilings and floors more effectively
- Built-in bumper minimizes damage due to dropping
- Any orientation charging means pagers can be stacked in any direction
- Wireless programming minimises repair costs, down time and shipping fees
- Nickel Metal Hydride battery eliminates "memory" problems associated with NiCad batteries
- Tracking mode will continuously page until the coaster is returned
